

IMPACT

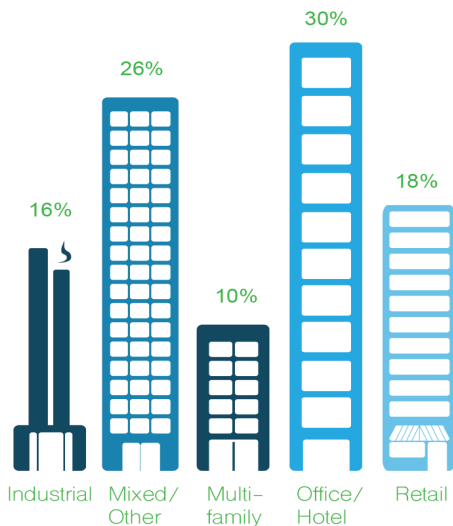

Reduced operating expenses from C-PACE help businesses compete locally and globally while creating jobs and reducing environmental impact.

PROJECT TYPES

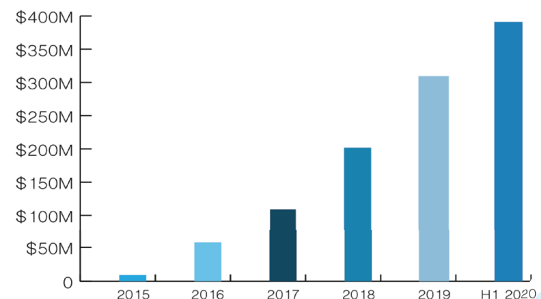

Renewable energy incentives and advances in technology drive solar installations, but combined energy efficiency and solar installations represent a growing project segment.

PROPERTY TYPES

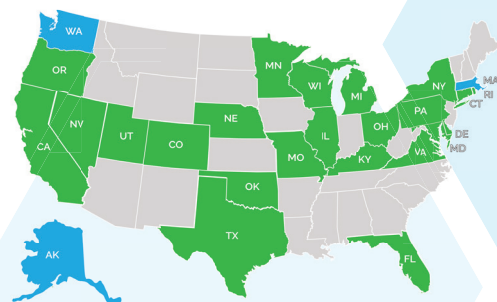

Most commercial property types qualify for C-PACE financing from Greenworks Lending.

ENERGY SAVINGS

Lifetime projected energy savings for property owners surpassed \$380M in Q2 2020.

NATIONAL EXPANSION

Since its start in 2015, Greenworks has significantly expanded its national reach, currently providing financing in 23 C-PACE enabled states and D.C. (blue = coming soon)

Impact measures are based on the Environmental Protection Agency's Greenhouse Gas Equivalencies Calculator. Number of jobs created is based on project expenditures, as suggested by the Council of Economic Advisers (CEA) for estimating job growth in the American Recovery and Reinvestment Act.
